

CAPTAIR MIDCAP 804 DUCTLESS FUME HOOD

Easy set-up - less than twenty minutes. Portable, easy to move and simple to operate. Comes equipped with a face velocity monitor. These small, ductless fume hoods offer total protection and a 99.9% filtration efficiency at an affordable price. Containment is insured with a minimum face velocity of 104 fpm. Clear, acrylic 3/8 in. walls on all sides provide great visibility and excellent spill protection. Standard clear-back panel allows for teaching-style demonstrations. Can be placed over a scale for weighing applications or may be used at a workstation to filter a variety of solvents, acids, formaldehyde, ammonia or particulates. Type M for gases and Type V for gases and fumes (particles). CE certified and UL and CSA listed. Complies with OSHA regulation 1910: 1450 and the AFNOR NF x 15-211 Class 2 filtration standard.
