

Students from Chapmanville HS had a fun time today while learning about projectile motion at one of the spring Projectile Motion Workshops held [by Dr. Sean P. McBride](#) in the [Department of Physics](#) at Marshall University. The event was sponsored by the Physics Department within the College of Science. [Society of Physics Students](#) members Casey Frye (Recruitment Officer for the Society of Physics Students) and Chase Preston assisted with guiding the students through the kinematics equations in two dimensions associated with projectile motion.
