

## Pendulum Waves at the Huntington Area and Kanawha County College Fairs (October 2nd & 3rd, 2017)!

The [Physics Department](#) enjoys participating in local college fairs and loves to show up with cool demos! This year [Dr. McBride](#) brought a pendulum wave apparatus. Over the course of 2 days, Dr. McBride talked with well of 100 students who had an interest in learning more about science and good portion of those were interested in physics specifically. Click on the link for a detailed description of the pendulum wave apparatus works: <https://www.youtube.com/watch?v=cjTczXq7hyc&t=23s>
