

The **Society of Physics Students (SPS)** group at Marshall is always looking for ways to increase the number of students in the Physics Department and do fun events with both the academic and surrounding communities. Recently, on August 20th, 2017 the SPS group participated in the WoW carnival at Marshall's Week of Welcome. This was a very fun opportunity for our Society of Physics Students for recruiting majors and minors for the department. The Physics Department's main attraction for the event was our carnival style projectile launcher game where students could launch mini cannon ball like projectiles at a target to compete for prizes. SPS members and new students alike enjoyed this event and everyone looks forward to the next one.

– Dr. Sean P. McBride, SPS Faculty Advisor
