

The First Green and White Day of 2022 was an exciting time for students (2/11/2022)! The Physics Department always has cool demos for you to experience and play with at Green and White Day! Come join us at the next Green and White Day! Along with cool demos, we have lots of information on career paths in physics, starting salaries in the job market, and information on further graduate education in physics. Come check us out and ask some questions! Thanks Dr. Foltz for helping out! Students, please contact Dr. Sean P. McBride ([mcbrides@marshall.edu](mailto:mcbrides@marshall.edu)) if you have questions about what you did or saw today or want to learn more about what a degree in Physics can offer you.
